

OFFICE OF THE MAYOR / CITY OF DALLAS

Proclamation

WHEREAS, Lung cancer is the leading cause of cancer death among men and women in the United States, accounting for more deaths than colon cancer, breast cancer, and prostate cancer combined; and

WHEREAS, The 5-year survival rate for localized lung cancer is around 60%, yet only 24% of lung cancers are diagnosed at this stage; and

WHEREAS, Screening for lung cancer for high-risk individuals using low-dose computed tomography can lead to the earlier detection of lung cancer and save lives; and

WHEREAS, Funding for lung cancer research trails far behind funding for research of many other cancers, and additional research is needed in early diagnosis, screening, and treatment for lung cancer as well as in lung cancer affecting women and lung cancer health disparities; and

WHEREAS, Lung cancer incidence is decreasing twice as fast in men as it is in women, each year more women die from lung cancer than breast cancer and by 2035, more women will die from lung cancer than men; and

WHEREAS, African Americans have the highest lung cancer incidence and mortality of all races, and disparities in lung cancer screening, diagnosis, treatment, and mortality are well characterized among African Americans and other racial minorities; and

WHEREAS, Lung cancer in individuals who never smoked is the 7th leading cause of cancer-related death and accounts for 17,000-26,000 deaths in the US every year, 60-70% of individuals diagnosed with lung cancer who never smoked are women, and the proportion of lung cancers diagnosed in people who never smoked is increasing in the US; and

WHEREAS, The stigma surrounding lung cancer creates barriers to early diagnosis, treatment, and funding for research, has a detrimental impact on the quality of life of people diagnosed with lung cancer, and hinders awareness of and research into lung cancer risk factors other than smoking; and

WHEREAS, Lung cancer research is leading to breakthroughs in the identification of genetic alterations associated with lung cancer and in the development of lung cancer treatments, including immunotherapies and targeted therapies; and

WHEREAS, organizations working in Texas such as the American Lung Cancer Screening Initiative and Women's Lung Cancer Forum, are committed to educating about lung cancer and lung cancer screening and working to increase lung cancer screening rates in our city.

NOW, THEREFORE, I, ERIC JOHNSON, MAYOR OF THE CITY OF DALLAS, do hereby proclaim November 2022 as

LUNG CANCER AWARENESS MONTH

in Dallas, Texas and recognize the need for research in lung cancer affecting women and lung cancer health disparities, and encourage all residents to learn about lung cancer and early detection through lung cancer screening.

Mayor, The City of Dallas
